Anti-FITA

Date:_____ **Sponsoring Branch:**_____

Event/Practice:_____ **Marshal:**_____

SCA Name (PRINT)	Modern Name	Branch	Divison	Static Square	Timed Square	Static Diamond	Timed Diamond	Total

Ends:

This shoot is designed to be shot at a range of 20 yards, and consists of 4 ends. Each Timed end is 45 seconds long. Each Static end is 8 arrows.

Square (flat side at the top), shoot a Timed and Static end.

Diamond (point at the top), shoot a Timed and Static end.

Scoring:

The point values for each space are as follows, starting at the smallest triangle out at the outside corner: 8 pts, 6 pts, 4 pts, 2 pts for the longest stripe, And that big space in the middle is worth nothing.

The catch is that each corner must be kept with the same number of arrows, monopoly style. That is you must have one scoring arrow in each corner before a second arrow may be scored in any corner. You must have two scoring arrows in each before a third may count, etc. Each 'corner' includes all four Stripes, *not* just the 8 pt corner triangle. This does not need to be maintained while shooting, only once shooting is complete and the end is being scored. It is up to the Individual archers to remember where they probably hit while shooting.
